

HELP WANTED: Part-time Position

We need someone who would like to share their skills part-time with Kitchenware Outfitters. The position will include every aspect of operating a retail business. Everyone who works at Kitchenware Outfitters is expected to learn all aspects of store operation from helping customers make purchases to receiving shipments from vendors, checking the shipments in, pricing and stocking, building displays and recommending when items need to be reordered. The successful candidate will have the following characteristics.

They like and respect other people. They enjoy being around people. They enjoy engaging them in conversation. They do not judge others based on what they perceive to be their social or economic status, and they value all people, even those with whom they may disagree. They are spoken of by their friends, acquaintances and even casual observers as a "nice" person.

The successful candidate will be a person for whom the art and science of cooking is important. They must enjoy cooking, and like to talk about cooking. Kitchenware Outfitters is a store that is dedicated to helping people make informed decisions about their culinary purchases so their preparation and serving of food and wine is safe, enjoyable and entertaining. So, if you do not enjoy cooking this may not be a good fit for you.

The successful candidate will be a very organized person, a self-starter who demonstrates initiative and has the ability to multi-task.

Computer skills must include experience working in a windows environment, utilizing Microsoft Word and Excel and average keyboarding skills. Experience working on a Windows-based Point of Sale software would be a plus.

We are fortunate to have a lot of visitors from other countries because of Gulfstream, the port, Thunderbolt Marine and Savannah's tourism attraction so if you have a spoken language fluency in addition to English it will be considered a plus.

If interested, stop by the store, and fill out an application!
